Summary

Dynamic and results-driven Frontend Developer with over 2 years of experience in creating high-quality, responsive websites. Proficient in modern frontend libraries such as React JS and Next JS, with a strong background in UI development, focusing on enhancing user experience and functionality. Adept at writing clean, efficient, and scalable code, consistently delivering projects to the next level of performance and design. Eager to learn and continuously improve, with a passion for staying productive and keeping up with the latest industry trends

Education

2018 – 2022
Gandhinagar, India

B.E. Computer Engineering, *Government enginnering college, Gandhinagar*
8.91 CGPA

2017 – 2018
Ahmedabad, India

HSC, *Nutan Higher secondary school*
81%

2015 – 2016
Ahmedabad, India

SSC, *Nutan Higher secondary school*
80%

Professional Experience

10/2022 – present
Gandhinagar, India

Web Developer, *Zignuts Technolab*

- Developed and maintained web applications using React JS and Next JS, along with styling frameworks such as MUI, Tailwind CSS, and Bootstrap, ensuring modern, responsive designs.
- Consistently delivered high-quality solutions by writing efficient, maintainable code, while also reviewing the code of other team members to ensure adherence to best practices and maintain project consistency.
- Led a project team for one of two projects developed from scratch, guiding the team through technical challenges and ensuring timely delivery of features.
- Engaged directly with clients, gathering detailed requirements, and translating them into effective technical solutions that aligned with business objectives.
- Played a key role in client meetings, effectively managing communications and ensuring that all project deliverables met the client's expectations in an efficient and timely manner.

04/2022 – 09/2022
Gandhinagar, India

Intern Frontend Developer, *Zignuts Technolab*

- Quickly gained proficiency in React JS and related UI frameworks, demonstrating adaptability and a strong capacity to learn in a fast-paced environment.
- Contributed to live projects, collaborating with team members to implement responsive, user-friendly interfaces while adhering to industry best practices.
- Assisted in developing and refining UI components, ensuring seamless functionality and an optimized user experience across different devices and platforms.
- Efficiently applied feedback to improve code quality and project outcomes, playing an integral role in delivering projects within tight deadlines.

Projects

Digital Assembly Platform

- A comprehensive cloud-based field service Customer Relationship Management & Interactive Portfolio Platform for B2B & B2C services. Developed a SaaS-based platform for furniture suppliers and manufacturers to create live digital assembly manuals.
- Implemented a responsive user interface using Reactstrap, ensuring a seamless and consistent user experience.
- Developed a custom video player with subtitle functionality, improving media interaction and accessibility.
- Integrated AI-based APIs to generate chatbot responses, enhancing user engagement with AI-powered interactions.
- Enabled PDF to image conversion with clickable bubble plotting on the image and context menu integration for dynamic user interactions.
- Built a multiple file upload manager, supporting various file extensions for efficient document management.
- Tools & Technology : React JS, ReactStrap, React-context

On-Demand Service Connection

- Designed and developed an on-demand service booking B2B marketplace connecting businesses with service providers. Built web applications with features for quotation management and efficient service provider hiring.
- Implemented RTL (Right-to-Left) design to support languages with RTL scripts, ensuring a smooth user experience for international audiences.
- Integrated Google Maps services for location-based features and interactive map functionality.
- Integrated Firebase for real-time notifications, enhancing user engagement with instant updates.
- Developed and maintained reusable common components to ensure consistency and efficiency across the project.
- Tools & Technology : React JS, ReactStrap, Redux, Firebase, Google map

Real-Time Bidding Platform

- Contributed to the development of a cloud procurement platform facilitating Auction, RFI, RFP, and RFQ processes.
- Streamlined communication between buyers and suppliers and introduced real-time bidding auctions.
- Implemented real-time bidding functionality using WebSockets to enable live interaction and updates during bidding sessions.
- Utilized MUI (Material-UI) for building consistent, responsive, and modern user interfaces.
- Added skeleton loader effects to improve user experience during content loading, providing visual feedback.
- Developed reusable common components for efficient and scalable code management across the application.
- Tools & Technology : React JS, MUI, Redux, Socket

Customer-Focused Restaurant Management Platform

- This is a free app that integrates all the management needed in a restaurant business through POS software.
- It synchronizes all processes through a mobile or tablet compatible with iOS or Android; it allows payment of accounts using any type of payment method; and it eliminates the use of inputs for invoices by sending bills via email, making it possible to generate a customer database.
- Developed an SEO-friendly web-based application to enhance online visibility and search engine rankings.
- Built an intuitive admin panel for efficient management of restaurant operations and user roles.
- Created an online order panel, allowing customers to place food orders through an integrated POS system.
- Implemented functionality for restaurants to add and manage their food items within the platform.
- Developed a discount management system for administrators to create and manage promotional offers.
- Implemented role and permission-based access control for administrators, ensuring secure and organized access to system features.

Smart Recruitment and Job Matching Tool

- Innovative web platform designed to streamline the recruitment process for both companies and job seekers.
- Companies can effortlessly create vacancies, invite candidates using advanced matching tools, and engage in real-time chat for instant communication.
- Job seekers can search and apply for jobs, receive personalized recommendations, and interact directly with potential employers.
- By enhancing efficiency, personalization, and transparency, JobFunders revolutionizes the hiring experience, making it faster and more effective for everyone involved.
- Implemented real-time chat functionality using WebSockets to facilitate instant communication between users.
- Integrated Mixpanel for advanced analytics, enabling data-driven decision-making and user behavior tracking.
- Developed a feature allowing candidates to apply for job vacancies directly through the platform.
- Enabled companies to create and manage job vacancies, streamlining the recruitment process.
- Implemented role and permission-based access control to ensure secure and organized user interactions.
- Built an SEO-friendly web-based application to improve search engine visibility and attract more users.
- Integrated Google Maps services for location-based features, enhancing user experience and accessibility.
- Tools & Technology :Next.JS, ReactStrap, socket, React-Context, Firebase, Mixpanel, Google Map
